

MORRIS FOR MAYOR

Do you think the city should be allowing the rezoning and sale of public assembly school lands to developers?

I do not believe we should be allowing the rezoning of public school lands so developers can increase density in our residential single family neighbourhoods. These public lands should be used by the city to increase public park spaces and playing fields, and to provide much needed locations for daycare and eldercare facilities, and for expanding our network of recreational and healthcare facilities for all our residents!

Public school lands if sold can never be replaced. What happens when school enrolment rebounds and these schools are needed? Densification will bring more school age children, where will they go?
